

PRASAD VICHARE

Chicago, IL | <https://www.linkedin.com/in/prasad-vichare/> | +1 312-459-8976 | pvich@uic.edu | [GitHub](#)

SUMMARY

Data Engineer with over 6 years of experience designing scalable ETL pipelines and cloud data warehouses on Azure and Snowflake. Proven expertise in SQL, Python, Spark, and Microsoft Fabric to deliver ML-integrated analytics and business intelligence solutions that drive operational efficiency

EDUCATION

University of Illinois Chicago <i>M.S. in Management Information Systems</i> <i>Relevant Coursework: Statistics, Big Data Mining, Advanced Database Management, Data Visualization</i>	Chicago, IL <i>Expected Graduation Date: May 2026</i>
University of Mumbai <i>Bachelor of Engineering in Electronics and Telecommunication</i>	Mumbai, IND <i>August 2014 - May 2018</i>

WORK EXPERIENCE

UI Health – Department of Cardiology <i>Technical Analyst</i>	Chicago, IL <i>December 2024 – Present</i>
• Accelerated enterprise-wide reporting by 35% by orchestrating pipelines from EPIC healthcare data into Microsoft Azure Data Lake using Microsoft Fabric, leveraging Lakehouse architecture and semantic modeling to provide faster insights to higher management. • Collaborated with clinical leadership to define key performance indicators, then enhanced decision-making by building interactive Power BI dashboards that provided real-time insights into provider performance and work RVUs.	
Reliance Jio Infocom Pvt. Ltd <i>Deputy Manager Data Engineer</i>	Mumbai, IND <i>September 2020 - July 2024</i>
• Mitigated spam-related traffic by 30% by directing the nationwide rollout of Reliance’s ‘Anti-Spam SMSC’ solution, filtering 10M+ SMS transactions per day while ensuring TRAI compliance. • Engineered production-grade ETL pipelines with Microsoft Fabric (data factory), PySpark, and SQL to process 10M+ daily records, integrating outputs into an Azure Lakehouse for large-scale enterprise analytics. • Partnered with the fraud analytics team to understand spam patterns and translated business requirements into an ML model using Python and Scikit-learn, improving Spam detection accuracy by 22% • Enabled real-time performance tracking by designing semantic data models and Power BI dashboards, providing leadership with immediate insights into spam attempts and system performance that informed strategic adjustments. • Developed and implemented a CI/CD pipeline for deploying ETL scripts and data models, reducing manual deployment errors by 90% and enabling faster iteration for the data analytics team.	
Quess Corporation <i>Data Analyst</i>	Mumbai, IND <i>January 2019 – September 2020</i>
• Streamlined analytics for daily operations covering 50K+ records by developing automated ETL pipelines with SQL to move operational data from AWS S3/Redshift into Snowflake, ensuring timely data availability • Architected a Snowflake warehouse using Medallion architecture (Bronze–Silver–Gold layers), creating optimized views and stored procedures at the gold layer to support critical reporting needs. • Improved leadership decision-making by delivering Tableau dashboards powered by automated data pipelines, providing interactive KPIs and drill-down insights into operational performance.	

SKILLS

Data Engineering & Warehousing: Microsoft Fabric, Azure (Data Factory, Data Lakehouse), Snowflake, Spark, ETL/ELT, Data Modeling, MS SQL Server, MySQL, CI/CD
Programming & Data Processing: Python (Pandas, NumPy, PySpark), SQL, R, Shell Scripting, Java, Linux
Analytics & Visualization: Power BI (DAX, Semantic Modelling), Tableau, MS Excel (Pivot, Power Query)
Machine Learning & Automation: Scikit-learn, Predictive Analysis, LLM, Workflow Automation
Project Management: Agile, SDLC, Stakeholder Management, Jira

ACADEMIC PROJECTS

<u>Cloud Data Warehouse & Analytics using Snowflake</u>	<i>July 2025</i>
• Built a Snowflake cloud data warehouse using Medallion Architecture with ETL pipelines from AWS S3 into a star schema for high-performance reporting • Implemented advanced SQL window functions and stored procedures to model customer segmentation and sales trends, delivering actionable insights into product performance.	

CERTIFICATIONS

AWS Academy Data Engineering • AWS Academy Cloud Foundations • Google Data Analytics
